WORK EXPERIENCE

FRONTEND WEB DEVELOPMENT
June 2025 - Currently
CIAO ITALIA
Krakow, Poland

React | Tailwind CSS | JavaScript | HTML | VSCode | WooCommerce API | Imoje ING API | WordPress | Hostinger

- Built and launched a custom e-commerce frontend using React and Tailwind CSS, integrating with WordPress via WooCommerce API and Imoje ING payment gateway.
- Developed key pages including homepage, product listings, cart, checkout, and reusable UI components like footers and banners.
- Handled CORS configuration and API communication to ensure smooth data flow between frontend and backend services.
- Managed deployment and file access through Hostinger; coordinated progress and design feedback in regular meetings with the client..

FULL STACK DEVELOPER
Jan 2025 - May 2025
SOMNI STUDIO
Barcelona, Spain

Godot | Astro | Tailwind | JavaScript | CSS | HTML | Notion | VSCode

- Designed and developed the mechanics of a video game using Godot Engine, leveraging my skills as a web designer and my experience in development with GDScript.
- Created the official website for the video game studio using Astro and Tailwind, along with JavaScript, implementing API integration for email management via CTA on Netlify.
- Actively collaborated with the team through Notion for task organization, idea sharing, and weekly planning, including virtual meetings to maintain motivation and alignment.

QA TESTER
Nov 2023 - Feb 2024
BRICKKEN
Barcelona, Spain

Automation Testing | Playwright | Jira | Intellij | Notion | Cypress

- Conducted comprehensive Web3 testing and detailed data analysis using recording tools and network analysis.
- Led a successful Playwright automation project and reported bugs in Jira, with documentation in Notion.
- Collaborated with team members to reproduce and resolve bugs, delivering exemplary error reports.
- Enhanced communication by creating instructional English videos for the international development team.

PROJECTS -> **Github**

To Do App – Java Microservices (Spring Boot) & React SPA
I developed a full-stack application with a backend built as microservices using Java, Spring Boot, and Hibernate, exposing REST APIs for business logic and database operations, deployed in Tomcat. On the frontend, I used React to create a modern SPA that consumes these APIs, allowing users to view, create, edit, and delete tasks. The React app manages all user interactions and updates the interface dynamically based on backend responses.

EDUCATION

JavaScript Course 2025
2025

Full Stack Spring Boot + React
2024

Mastering HTML and CSS
November, 2024 at Udemy

Multimedia Application Development
2022 - 2024 at Institute of Poblenou

Digital Marketing & Advertising
2019 - 2021 at Institute of Poblenou

SKILLS

Languages and Technologies: Microservices, Java, Spring Boot, Hibernate, React, Astro, JavaScript, HTML, Tailwind, CSS, Node.js. Express, Tomcat, jQuery

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Firebase, H2

Version control & Deployment: Github, Git, Docker

Testing and Automation: Postman, Test Automation, Manual Testing, Regression, PlayWright, Reporting, Agile Testing, Cypress, Selenium

IDEs: IntelliJ, WebStorm, Visual Code, Android Studio

Project Management: JIRA, Discord, Microsoft Teams, Notion, Wordpress, Hostinger
